## Why choose infrared

Unlike other supplemental heating appliances, infrared heaters do not heat the air and instead emit a clean, safe wavelength of light that only warms the objects the wavelength touches.

## Keep your space clean and green

Infrared heaters are more energy-efficient than other space heaters. They use 100 percent of the heat they produce, which creates almost no loss in heat transfer to zone heat at a low cost

## Control in style

Easily control all Eurofase Heating heaters with our available switches, featuring high/low and on/off functionality. Available in a stainless steel or white cover, we offer single, double or gang configurable switches that can be installed in-wall, surface mounted or recessed.

*\* EF15120 is plug-in only.*
